

## Home Page

Main pages have their Buttons placed at the top of screen for easy access.

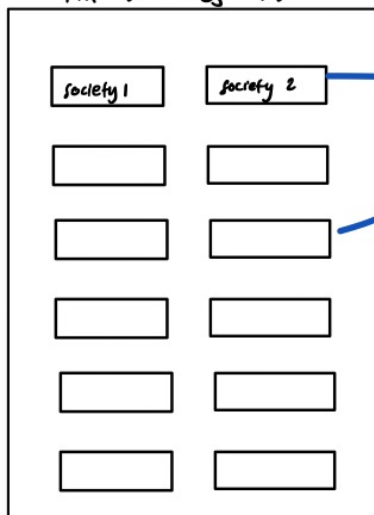

Home button: prominent location in top left, easy to see

Societies button: placed in the middle, between the other two important buttons, as it is of equal importance, and is crucial to the app's functionality

Profile button: intuitively on the right, mimicking the UI for many apps, who have the user's profile accessible on the top right. Adds to ease of use for the user as its location is familiar

Displays the latest, upcoming events, right on the Home Page – allows the user to quickly one-tap into the app and have the latest useful information immediately at their fingertips.

## All societies list

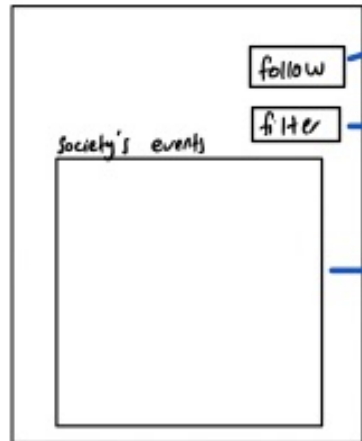

The list of Societies are listed out as cards for ease of access for the user to find events specific to the specific Society they are looking for.

The cards are chosen over drop down lists, so that it is easier for users to one-tap into each Society without having to scroll and find the one they are looking for.

The cards also show the banner of the society so that if a user is unaware of what a society is by name the image itself might trigger something within them to learn more about it

### Societies page

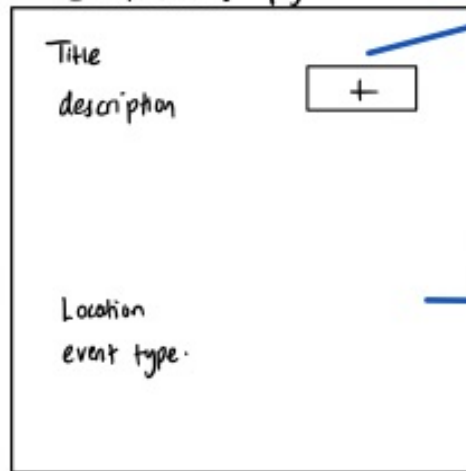

The "Follow" feature is added to the UI to allow users to get priority notifications for the Societies they wish to be actively updated on. The button is placed prominently before the list of events, to remind the user of this feature, and to allow them to easily follow and unfollow if needed.

The "Filter" feature is added to the UI to allow users to easily find the events that they want. The button is placed prominently in the top right, before the list of the events, so that the user can filter before they scroll.

Prominently lists the current Society's events right on entrance to the page.

### Event details page

The button to add the event to the user's own personal calendar is situated prominently in the top right, for ease of access, and to remind the user to add the event to their calendar, if they so wish.

The event details page for each event goes with the Title of the event situated prominently at the top of the screen, as it is the most important information the user will need. It is followed by the description, location, and event type.

filter Popup

filter by date

filter by type

filter by university

filter by society

The "Filter" feature gives four sorting options, and they are listed as a popup of a dropdown list. This makes it easier for the user to filter to what they specifically need.

Profile page

History

Settings

Calendar

Followed Society

The history and settings button are located on the top right, taking advantage of its prominent location as a familiar feature across many apps.

The calendar and the list of followed Societies are displayed on the user's profile underneath their name, as a quick one-tap provider of information that the user specifically requested through the features of the app.

### Settings page

Notifications settings

Calendar settings

The settings page prominently displays two buttons of the adjustable settings. They are in big font, and displayed prominently without any interference, for the user's ease of access and readability.

### New feedback form

Comments

Cancel

Submit

Form contains text fields, and is easy for the user to type in directly and use.

The "Submit" and "Cancel" buttons are placed prominently below the form, allowing the user to easily identify the button they wish to press. Placement follows user familiarity of other apps placing similar buttons.
